INVITED SPEAKERS CHRIS BABER, HANNELE DUFVA, SABRINA
GOLONKA, DAVID KIRSH, LAMBROS MALAFOURIS,
JOANNA RAĆZASZEK-LEONARDI, LI WEI

The theme of CILC2016 is *The Tactility of Thinking and Talking*: the transactional weaving of people, things, and words, that reflects a coordination at different time scales and from which language and cognition emerge. We invite researchers from fields such as psychology, philosophy, cognitive archaeology, semiotics, applied and theoretical linguistics, communication, business and education to present papers on the windows that ecosystems offer on languaging and thinking.

Papers can be submitted either as an oral or poster presentation. Abstracts (maximum 300 words) should be submitted to the conference chair Frédéric Vallée-Tourangeau (f.vallee-tourangeau@kingston.ac.uk) by Friday 29 January 2016. Speakers will be notified by 25 March 2016.
